Hannah Gomberg

Full-Stack Developer (React) | Registered Nurse | Healthcare Technology

Israel | 058-753-8448 | hgomberg@gmail.com | linkedin.com/in/hzuber-dev

PROFESSIONAL SUMMARY

Full-Stack Developer with 8+ years of experience building React, TypeScript, and Node.js applications, and a licensed Registered Nurse (BSc Nursing) with 5+ years of emergency and clinic experience. I combine production-grade engineering with firsthand knowledge of clinical workflows, EHR systems (including Epic), and clinician-patient communication under time pressure. Experienced in secure authentication (Auth0, Azure AD, JWT), REST APIs, accessible UI, and design systems, and in using AI-assisted development (Claude Code, MCP) to ship faster. Seeking to build healthcare software that clinicians and patients can actually use.

SKILLS

Healthcare Domain: Registered Nurse (RN), Clinical Workflows, Emergency and Ambulatory Care, EHR Systems (Epic), Patient Communication, Care Coordination

Front-End: React, TypeScript, JavaScript, HTML5, CSS3, SCSS, Tailwind CSS, Chakra UI, Remix, GatsbyJS, jQuery, Blazor, Responsive Design, Web Accessibility, Design Systems, Figma-to-Code

Back-End: Node.js, Express, REST APIs, GraphQL, MySQL, PHP, C#, ASP.NET, Microsoft Graph API, Auth0, Azure AD, JWT Authentication

CMS and Headless: WordPress, Gutenberg (custom blocks), WPML (multilingual), Headless Architecture, WordPress-to-React Migration

Tools and DevOps: Git, GitHub, Bitbucket, Docker, DDEV, AWS, Cloudflare, nginx, CircleCI, Jenkins, Heroku, Playwright, Chrome DevTools, Linear

AI and Automation: AI-Assisted Development, Claude, Claude Code, Model Context Protocol (MCP), Prompt Engineering, Figma MCP, AI Agent Skills and Plugins

Practices: Agile/Scrum, Code Reviews, Performance Optimization, State Management, Cross-Functional Collaboration, Rapid Prototyping

Languages: English (native), Hebrew (bilingual)

PROFESSIONAL EXPERIENCE

Web Developer, Marketing | **Atera** Feb 2026 - Present

- Develop and maintain the Atera marketing website on WordPress, building custom Gutenberg blocks and reusable components for marketing and campaign pages.
- Contribute to the planned migration from WordPress to a headless React architecture, documenting existing user flows (webinar registration, signup) and mapping them to the new design.
- Debug and improve signup and authentication flows (Auth0, JWT, cross-site cookies, Cloudflare WAF), resolving production and staging issues across environments.
- Manage multilingual English and Hebrew content with WPML, including language routing, search, and redirect fixes.
- Translate Figma designs into responsive, pixel-accurate HTML, CSS, and JavaScript, including custom JS-driven layout components.
- Maintain local, staging, and production workflows using DDEV, AWS, nginx, and Git, and automate environment switching with shell scripts.
- Use AI-assisted development tools (Claude, Claude Code) to accelerate debugging, code investigation, and documentation across WordPress, React, and infrastructure work.
- Apply Model Context Protocol (MCP) integrations, including Figma, to speed up design-to-code workflows for marketing pages.
- Collaborate with marketing, design, and engineering teams in an agile environment at an AI-driven IT management company.

Front-End Developer | **Chamelio AI** Dec 2024 - Jan 2026

- Built and maintained scalable, reusable UI components for a legal-tech web application and a Microsoft Word add-in.
- Translated Figma designs into pixel-perfect, responsive interfaces with a focus on usability and accessibility.

- Partnered with designers to establish and enforce a consistent design system across multiple platforms.
- Collaborated with backend engineers to design and implement data schemas, ensuring seamless front-end and back-end integration.
- Implemented robust state management and data handling to support complex legal workflows.
- Translated domain-heavy legal workflows into clear, usable interfaces, a skill first built as a clinician explaining complex care to patients.
- Optimized application performance and user experience in a fast-paced, iterative environment.
- Contributed to product strategy discussions and participated in agile practices, including code reviews, sprint planning, and rapid prototyping.

Full-Stack Developer | **Vayyar Imaging Ltd.** Jan 2020 - Oct 2024

- Led development of a React and Gatsby e-commerce site, improving load time through code optimization and lazy loading.
- Created a REST API that let the sales team pre-plan holiday discounts and change prices instantly without redeploying the site.
- Collaborated with the Marketing team to build interactive tools that let customers visualize their potential savings.
- Designed and developed an office meeting-room status app using Remix, Microsoft Graph API, Azure security, and Tailwind.
- Designed and developed a full-stack parking coordination app using Blazor, C#, ASP.NET, and MySQL, with Azure AD authentication and authorization.

Front-End Developer (Contract) | **Reflective** Oct 2023 - Nov 2024

- Updated an existing React website to optimize language switching and translations.
- Updated the React front end and MySQL database to support new templates and language preferences.
- Created reusable React components and custom hooks.

WordPress Developer (Self-Employed) | **Freelance** Sep 2018 - Jan 2020

- Designed and developed WordPress websites for individuals, small businesses, and non-profits on a contract basis.

Registered Nurse | **Emergency and Healthcare Clinics, Israel and USA** Oct 2013 - Jun 2019

- Provided frontline care in emergency and clinic settings, prioritizing cases and making fast decisions under time pressure.
- Documented care, orders, and results in Epic and in Israeli clinic systems, gaining daily hands-on experience of how EHR design helps or slows clinicians.
- Coordinated communication between doctors, patients, outside care centers, and labs, relaying clinical details accurately across handoffs.
- Guided patients and families through tests, treatments, and procedures, explaining what to expect in clear, accessible language.
- Evaluated patient medical history to help identify root causes of symptoms.

EDUCATION AND LICENSURE

Full-Stack Developer Program | **Thinkful Online Bootcamp** May 2019 - Jan 2020

Bachelor of Science in Nursing | **Jerusalem College of Technology** Sep 2008 - Jun 2013

Registered Nurse (RN) License | **Israel Ministry of Health** Active
